SUMMARY

Motivated Computer Science undergraduate with solid foundations in **Java, web development, and MySQL**. Skilled in **full-stack development**, object-oriented programming, and collaborative software engineering. A fast learner with hands-on experience building applications, solving technical challenges, and contributing effectively in team-based environments..

WORK EXPERIENCE

Software Developer Intern (Java Full Stack – Angular), Infosys

July 2025 – Present

- Developed full-stack application features using **Spring Boot** (backend) and **Angular** (frontend).
- Built and integrated **RESTful APIs** with Angular components for seamless data flow.
- Implemented responsive UI screens, services, and routing in Angular using **TypeScript**.
- Debugged and optimized code across the stack, improving performance and reliability.
- Collaborated using **Git/GitHub** and followed Agile development practices.
- **Skills:** Java · Spring Boot · Angular · REST APIs · TypeScript · Git/GitHub

PROJECTS

• Student Marks & Result Evaluation [\[Demo\]](#)

- Developed a **Java-based student result calculator** using OOP concepts including abstraction, inheritance, and polymorphism.
- Designed modular classes (**Person, Student, ResultCalculator**) with method overloading and overriding.
- Automated pass/fail evaluation using a clean CLI interface.
- Prioritized **code reusability, scalability, and modular structure**.

• Employee Management System [\[Demo\]](#)

- Built an **Employee Management System** in Java applying encapsulation, constructors, and method overriding.
- Used **HashSet/TreeSet** to store unique employee records.
- Demonstrated solid understanding of the **Collections Framework**.
- Designed flexible classes to enable future enhancements with minimal changes.

• Mini Banking System (Java)

- Created a console-based banking system using Java OOP principles.
- Implemented core features: account creation, deposit, withdrawal, balance inquiry, and transaction history.
- Used modular components for account management and business logic.
- Added exception handling and input validation for robust execution.

EDUCATION

B.Tech in Computer Science Engineering, Sri Venkateswara Engineering College, Tirupati

2021–2025

Intermediate (Class XII) – MPC, Chandra Reddy Junior College, Nellore

2019–2021

Secondary School (Class X), Ratnam High School, Nellore

2018–2019

SKILLS

Programming & Core Concepts:	Java, C++, SQL, OOPs, Data Structures & Algorithms, Collections Framework
Web & Frontend:	HTML, CSS, JavaScript
Frame Works:	Spring Boot, RESTful API Design, Microservices
Database & Integration:	MySQL, Postman
Version control:	Git, GitHub
